

Surgical Cut Suits and Trauma Training Models

Kategoria

High fidelity patient simulators

Description

Prepare clinicians to handle the stress and challenges of traumatic injuries and mass casualty care

CAE Healthcare is the worldwide distributor for Strategic Operations (STOPS) Inc. medical products, including the Surgical Cut Suit, EMS/TCCC Cut Suit, 6-in-1 trainer and blast trousers for simulation-based education in traumatic events, from point-of-injury triage and treatment en route to transition of care and surgical intervention. Hyper-realistic®, cut suits and task trainers simulate extreme physical trauma so medical and non-medical personnel may safely learn to manage severe patient trauma scenarios by mimicking the realistic look, feel, behaviors and smells of extreme medical events.

SURGICAL CUT SUIT

Partial task surgical simulator for practicing hemorrhage control, organ incisions suture techniques, laparotomy, abdominal exploration and more.

Specifications:

- Skin and organs are user-repairable, allowing for multiple uses per unit
- Interchangeable organs with variable wound patterns or pathologies (internal & external hemorrhaging)
- User created and customizable wounds

BPS (BLOOD PUMPING SYSTEM)

An innovation in patient-worn bleeding simulation, BPS is a hyper-realistic medical training system designed to simulate human arterial and venous hemorrhage in conjunction with simulated human injury products.

Specifications:

- Self-contained and allows for 4 simultaneous bleeds controlled by a wireless fob with a 50-foot standoff
- Each line can be controlled by the operator to simulate both venous and arterial bleeds

EMERGENCY MEDICAL SERVICES/TACTICAL COMBAT CASUALTY CARE (EMS/TCCC) CUT SUIT

Realistically prepare medical teams to treat and manage the three primary causes of death on the battlefield at the point of injury, following emergency assessment and during subsequent treatment.

Specifications:

- Allows medical providers to treat the three primary causes of death on the battlefield
- Streamlined frame with minimal wearer profile increases hyper-realism of any training scenario

6-IN-1 TRAINER

Combining multiple task trainers within one unit, the 6-in-1 trainer eliminates the need for multiple products. Comprised of a hyper-realistic anatomically-similar male or female head and upper torso.

Specifications:

- Skeleton utilizes user-repairable body skin, neck skins, tracheas, and user-replaceable intraosseous training pucks

ADDITIONAL FEATURES

VIEW

ADDITIONAL FEATURES

Interchangeable organs with variable wound patterns or pathologies

Realistic training in internal & external hemorrhaging management

Clothing, uniform, body armor, and equipment is usable over the Cut Suit

Completely user-customizable and repairable

Cut Suits can be worn during intensely physical scenarios at the point of injury

Allows for interaction with a live patient during the emergency assessment and treatment process

6-in-1 trainer provides practice in obstructed or surgical airways, catheter insertion and more

“The Cut Suit is outstanding and super realistic. It’s one

of the closest things I've ever felt to real human tissue."

U.S. Navy Chief Corpsman
